

Task 3

Bug ID	Severity	Priority	Steps to Reproduce	Expected Result	Actual Result	Suggested Fix
BUG-001	Medium	High	1. Open the website on a mobile device. 2. . Select an outlet (e.g., Hounslow). 3. Continue to the homepage.	The selected outlet should be visible in the header, just like it is on the desktop version.	The selected outlet is shown on the desktop website, but it is missing from the header in the mobile version	Display the selected outlet in the mobile header so the experience is consistent across all devices.
BUG-002	Medium	Medium	1. Add an item to the cart. 2. Open the cart page.	Users should be able to increase or decrease the quantity of items directly from the cart.	There are no buttons or controls to increase or decrease the quantity of an item.	Add '+' and '-' buttons in the cart so users can easily update item quantities.
BUG-003	High	High	1. Add more than one item to the cart. 2. Try to remove only one item.	Only the selected item should be removed from the cart.	Instead of removing one item, the entire cart is cleared.	Allow users to remove individual items without affecting the rest of the cart.
BUG-004	Medium	Medium	1. Open the Select Outlet page on a mobile device. 2. Rotate the phone to landscape mode. 3. Try to scroll the page.	Users should be able to scroll through the page normally.	Scrolling does not work in landscape mode, making it impossible to view all the outlets.	Fix the page layout so scrolling works properly in landscape orientation.
BUG-005	High	High	1. Open the Dine In reservation page on a mobile device. 2. Open the reservation calendar. 3. Select a past date and time.	Users should only be able to select current or future dates and available times.	The system allows users to select past dates and times for reservations.	Disable past dates and times in the calendar and add validation before confirming the reservation.
BUG-006	Low	Medium	1. Open the website on a mobile device 2. Scroll to the footer section.	The App Store and Google Play badges should display correctly.	Both badges appear as plain black boxes instead of the proper store images.	Fix the image rendering so the App Store and Google Play badges display correctly.

BUG-007	Medium	Medium	1. Refresh the homepage several times. 2. Check the Google star rating each time.	The Google rating should remain consistent unless the actual rating changes.	Different star ratings are displayed on different page loads.	Investigate how the rating is being fetched and ensure a consistent value is displayed.
BUG-008	Medium	High	1. Open the website. 2. Click the Facebook, Instagram, and TikTok icons.	Each icon should open the corresponding social media page in a new tab.	None of the social media icons navigate to their respective pages.	Link each social media icon to the correct official social media page.

Taks 4

Cross-Browser Test Execution

Test Case ID	Test Scenario	Chrome	Microsoft Edge	Result	Remarks
TC-003	Select Outlet	Pass	Pass	Pass	Outlet selection worked correctly in both browsers.
TC-007	User Login	Fail	Fail	Fail	Login functionality not working as expected in both browsers.
TC-011	Add Item to Cart	Pass	Pass	Pass	Items were added to the cart successfully in both browsers without any functional differences.
TC-006	Delivery Order	Pass	Pass	Pass	Delivery page opened successfully and displayed the correct menu in both browsers.

Responsive (Mobile) Testing

Test Case ID	Test Scenario	Result	Remarks
TC-003	Select Outlet	Fail	The selected outlet name was not displayed in the mobile header after selecting an outlet.
TC-006	Dine-In Reservation	Fail	Users were able to select past dates and times when making a reservation.
TC-011	Shopping Cart	Fail	Users could not increase or decrease item quantities, and individual items could not be removed from the cart.
